To whom it may concern,

I am delighted to submit a recommendation letter for Mr. Md Kawsher Mahbub, whom I have observed develop both intellectually and personally over the previous five years into a mature individual suited for graduate studies in every way. He is an outstanding, active, caring, and well-rounded individual. Where he finished his undergraduate studies, I taught Object-Oriented Programming Language, Data Structures, and other relevant subjects. I found him to be highly attentive and enthusiastic about the subject matter of the courses while lecturing. His grades – consistently above average in all of his undergraduate semesters – indicate his explicit knowledge of courses.

As for research, I found him very much organized in his job. I supervised him in his undergraduate dissertation on Best Eleven Forecast for Bangladesh Cricket Team with Machine Learning Techniques. He has worked on a total number of seven research papers under my supervision. He is still on a research project under my supervision. From my close and constant supervision, I noticed that his passion and perseverance to get things done to make him most suitable for research. He ensconced quickly in the research and dealt with it pretty well, and he devotes himself entirely to the anatomy of a research project in which he is involved. One of his exciting research article titles is Deep Features to Detect Infectious Disease in Chest X-ray: Covid-19, Pneumonia, and Tuberculosis. He proposed a deep neural network that can help diagnose Covid-19, Pneumonia, and Tuberculosis with a single DNN architecture without changing any parameters. His academic credentials are deemed above average (within the upper 5%). Aside from his academic performance, he provided us with well-organized cultural programs that demonstrated his organizational skills.

Mr. Mahbub is an unpaired among his peers with a lot to offer, and any college would be delighted to have him. We were fortunate to have him as a student at our university, and I'm sure your faculty will feel the same if he is admitted. I am confident that he will excel in his future studies and research. I wholeheartedly endorse him and wish him the best of luck in all of his future endeavors.

Sincerely yours,

Milon Biswas
